OPEN TO INNOVATION!

PIVOT LINE

ANOTHER DIMENSION OF PANEL DOORS

As part of the PIVOT LINE collection, we present the inspiration of aluminum doors with increased proportions, and the highest level of design. Responding to the latest trends, we have designed a new range of PIVOT door systems.

The structures of this system are characterized by large dimensions and an offset pivot, which gives a monumental and modern effect to the entrance. We have designed 18 models of panel doors, which with their range of styles and proportions,
you can find the perfect match for your needs. These solutions are being used more and more often in contemporary door architecture.

PIVOT LINE doors not only convince architects with their innovative technology, but also with the unique design of the patterns and decorative features of the materials used.

*** The actual colours of the products may vary from the images in our catalogue - this depends on your current monitor/screen settings.**
